

Quality & Comparison

CADIQ analyzes native CAD models to qualify and compare the geometry and topology of a translated model to the originating model, ensuring design shape integrity for downstream reuse.

FEATURES

- Supports SASIG & JAMA PDQ diagnostics and Six Sigma batch reporting
- Easy-to-use diagnostic user interface identifies the location and properties of CAD model quality defects
- Side-by-side viewer enables easy comparison and analysis results
- Create custom configured batch processes to qualify and/or compare models; monitor the processes real-time

INTERFACE SUPPORT

NATIVE	NEUTRAL	PLATFORMS
• CATIA v4	• IGES	• Sun Solaris
• CATIA v5	• STEP	• HP UNIX
• Pro/E	• Parasolid	• IBM AIX
• IDEAS		• Windows
• SolidWorks		
• Unigraphics		

"If your company translates models from one system to another, CADIQ belongs in your toolkit."

Stephen Wolfe
The CAD Report
