

Installation Instructions for CADfix 7.1 Service Pack 2

Special Notes:

o Windows users only:

Before installing SP2 you must first install some extra Microsoft runtime dlls. You should find an executable in the SP2 zip file called:

 vcredist_x86.exe

Please run this to install the extra runtime dlls.
It will require administrator access to run.

Vista users: You must temporarily disable the User Account Controls before installing service packs.

o CATIA V5 users only:

SP2 is incompatible with the CATIA V5 interfaces in 7.1 (+SP1) and after installing SP2 the V5 interfaces will be unavailable. To restore the V5 interfaces you must install the CATIA V5/R18 service pack that is released alongside SP2.

Installation instructions:

- 1) Check you have all the files needed for this installation.
You should have 2 files:

 README.txt (this file)
 cf71sp2_nt.sp (service pack file, name of file depends on platform,
 this is the Windows version)

- 2) Make sure you have the necessary permissions to modify the CADfix installation (the installation process will check this).
- 3) Make sure that CADfix is not currently being used.
- 4) Start CADfix.
Select the Help menu and choose the "CADfix Administration..." option.
Use the Administration tool to install the service pack file.
- 5) Exit CADfix and restart to complete the installation process.
